EDUCATION

Karpaga Vinayaga College — Chennai, India
B.E - Computer Science and Engineering, GPA: 8.1 — Nov 2022 - Present
Shanthi Nikethan Matric — Perambalur, India
High School - Computer Science, Grade: 82.6 — June 2021 - May 2022

SKILLS SUMMARY

- **UI/UX Design**: Figma, Adobe XD, Canva
- **3D Modelling & Animation**: Blender, Unreal Engine
- **Graphics**: Adobe Photoshop, Adobe Illustrator
- **Editing**: DaVinci Resolve, Premiere Pro, After Effects

INTERNSHIP

Front-End Web Developer Intern | NSIC — **Feb 2024 - March 2024**

- Enhanced practical understanding through interactive tools like Flexbox Froggy and Grid Garden.
- Applied layout techniques to real-world projects, improving UI design consistency and user experience.

Java Full Stack Web Development Intern | GB Tech Corp — **Feb 2025 - March 2025**

- Developed responsive front-end interfaces using HTML, CSS, JavaScript, jQuery, and Bootstrap.
- Built robust back-end applications with Spring Boot and Java, integrating with MySQL for database operations.
- Collaborated in an agile development environment, participating in team-based sprints and code reviews.
- Gained hands-on experience in API and AGI integration, improving real-time data communication in web applications.

Full Stack Web Development Intern | Unified Mentor — **Feb 2025 - May 2025**

- Developed front-end modules and back-end logic for dynamic web applications.
- Strengthened skills in both client-side and server-side technologies through real-world project involvement.
- Demonstrated consistency, hard work, and the ability to adapt to team workflows and deadlines.
- Received commendation from mentors for dedication and strong contribution to project success

Designer Summer Intern | ZOHO Corporation — **July 2025 - Dec 2025**

- Learned organization-level design practices from senior designers and developers, focusing on business-driven design thinking and visual analysis.
- Translated business requirements and pain points into effective illustrations and user-centric design solutions.
- Successfully delivered 50+ projects in six months, handling multiple design tasks with consistent quality and timely execution.
- Created diverse design assets including websites, posters, blogs, testimonials, newsletters, and marketing visuals for ZOHO.

PROJECTS

Paradize e-commerce - Frontend | VIEW — **March 2024 - April 2024**

- Developed a responsive e-commerce site using HTML, CSS, JavaScript showcasing modern UI/UX design and smooth navigation.
- Created dynamic product listings with interactive cards, filters, and hover effects to enhance user engagement.
- Integrated cart preview, category sections, and minimal layout focusing on accessibility and responsiveness.
- Tools: HTML, CSS, JS, GitHub Pages. Built for showcasing product collections with real-world e-commerce UI flow.

Anna University Stucor – Modern UI/UX Design for Desktop | VIEW — **Nov 2024 - Feb 2025**

- Designed a modern, user-centric UI for Anna University's STUCOR platform to enhance academic access and student experience.
- Focused on intuitive navigation, GPA/CGPA tools, study material hub, and personalized student dashboards.
- Tools used: Figma, Adobe XD. Emphasized accessibility, minimalism, and mobile-friendly responsive layouts. Collaborated with students and faculty; improved usability, engagement, and academic resource discoverability

Duplicate Finder Pro - Flutter Desktop App | VIEW — **Dec 2024 - May 2025**

- Built a Flutter desktop app to detect and list duplicate files using Isolates for faster scanning and BLoC for responsive state handling.
- Enabled user-defined filters with extension-based scan control and dynamic results stored locally using Sqflite. Integrated animated splash screen and designed a Windows-like UI for better user experience and visual consistency.
- Tools: Flutter, Dart, BLoC, Sqflite, Isolates, Desktop Styling. Scans folders, finds duplicates, and prepares for future deletion support

CERTIFICATES

Building ChatGPT Messenger using NEXTJS — **Nov 2023**

- Mastered Next.js fundamentals to build a ChatGPT-style messenger UI with React components.
- Acquired hands-on tool setup, API integration, and environment configuration in a 2-day workshop.

UI/UX - Great Learning — **Jan 2024**

- Gained foundational UI/UX skills, including wireframing, layout, and design principles.
- Learned user-centereddesign, visualhierarchy,andaccessibility basics for digital interfaces.

Immersive Experience Design – AR, VR, MR & XR Workshop — **Oct 2024**

- Explored fundamentals of AR, VR, MR and XR technologies through interactive hands-on sessions.
- Learned about immersive tech trends, tools, and real-world applications in education and design.
