Karpaga Vinayaga College
B.E – Computer Science and Engineering, GPA: 8.2
Shanthi Nikethan Matric
High School – Computer Science, Grade: 82.6

Chennai, India
Nov 2022 – Present
Perambalur, India
June 2021 – May 2022

- **Languages:** Python, Java, .NET, HTML, CSS, JavaScript, SQL
- **Frameworks & Tools:** ReactJS, Flutter, Node.js, Express.js
- **Databases:** MySQL, MongoDB (beginner)
- **UI/UX Design:** Figma, Adobe XD, Canva
- **3D Modelling & Animation:** Blender, Unreal Engine
- **Graphics:** Adobe Photoshop, Adobe Illustrator
- **Editing:** DaVinci Resolve, Premiere Pro, After Effects

- Gained hands-on expertise in Flexbox and CSS Grid to develop responsive and adaptive web layouts.
- Enhanced practical understanding through interactive tools like Flexbox Froggy and Grid Garden.
- Applied layout techniques to real-world projects, improving UI design consistency and user experience.
- Translated newly acquired skills into project work, optimizing both structure and functionality across devices.

- Developed responsive front-end interfaces using HTML, CSS, JavaScript, jQuery, and Bootstrap.
- Built robust back-end applications with Spring Boot and Java, integrating with MySQL for database operations.
- Collaborated in an agile development environment, participating in team-based sprints and code reviews.
- Gained hands-on experience in API and AGI integration, improving real-time data communication in web applications.

- Developed front-end modules and back-end logic for dynamic web applications.
- Strengthened skills in both client-side and server-side technologies through real-world project involvement.
- Demonstrated consistency, hard work, and the ability to adapt to team workflows and deadlines.
- Received commendation from mentors for dedication and strong contribution to project success.

- Developed a responsive e-commerce site using HTML, CSS, JavaScript showcasing modern UI/UX design and smooth navigation.
- Created dynamic product listings with interactive cards, filters, and hover effects to enhance user engagement.
- Integrated cart preview, category sections, and minimal layout focusing on accessibility and responsiveness.
- Tools: HTML, CSS, JS, GitHub Pages. Built for showcasing product collections with real-world e-commerce UI flow.

- o Designed a modern, user-centric UI for Anna University's STUCOR platform to enhance academic access and student experience.
- o Focused on intuitive navigation, GPA/CGPA tools, study material hub, and personalized student dashboards.
- o Tools used: Figma, Adobe XD. Emphasized accessibility, minimalism, and mobile-friendly responsive layouts.
- o Collaborated with students and faculty; improved usability, engagement, and academic resource discoverability.

- Built a Flutter desktop app to detect and list duplicate files using Isolates for faster scanning and BLoC for responsive state handling.
- Enabled user-defined filters with extension-based scan control and dynamic results stored locally using Sqflite.
- Integrated animated splash screen and designed a Windows-like UI for better user experience and visual consistency.
- Tools: Flutter, Dart, BLoC, Sqflite, Isolates, Desktop Styling. Scans folders, finds duplicates, and prepares for future deletion support.

- Mastered Next.js fundamentals to build a ChatGPT-style messenger UI with React components.
- Acquired hands-on tool setup, API integration, and environment configuration in a 2-day workshop.

- o Gained foundational UI/UX skills, including wireframing, layout, and design principles.
- o Learned user-centered design, visual hierarchy, and accessibility basics for digital interfaces.

- Explored fundamentals of AR, VR, MR and XR technologies through interactive hands-on sessions.
- Learned about immersive tech trends, tools, and real-world applications in education and design.
